## REDEVELOPMENT OF THE KING DAVID MOWBRAY GOLF COURSE AND SURROUNDS

**Levels of Service (LoS)** is a grading system used to evaluate existing performance and assess the impact of proposed developments on the surrounding road network.

It reflects factors such as traffic flow, speed, delay, and congestion, with LoS A representing free-flow conditions and LoS F representing severely congested conditions.

The existing traffic LoS at peak hour show the current conditions. The future LoS at peak hour show the future conditions with the development trips after the upgrades.

**EXISTING TRAFFIC LEVELS OF SERVICE AT PEAK HOUR**

**FUTURE LEVELS OF SERVICE WITH UPGRADES AT PEAK HOUR INCLUDING DEVELOPMENT TRIPS**
